Product introduction

The car air purifier adopts multiple purification technology, which can effectively remove PM 2. 5, smoke, dust, pollen, pet dander and formaldehyde and other pollutants, purifying the air inside the car, reduce the air pollution that causes health risks, in order to provide users a healthy and clean ride environment. This car air purifier is a healthy companion for you and your family.

This product appearance is exquisite, the use is convenient, the adaptability is strong, can also apply to the shoe cabinet, the clothing cabinets, pet houses and other small space air purification.

Product Features

Antibacterial

Effectively inhibit bacterial breeding and reduce pathogenic bacteria.

PM2.5 Purification

Effectively remove PM2.5 and other particulate matter.

Formaldehyde purification

Effective removal of formaldehyde volatile organic matter, away from harmful gas damage.

Anion purification

Keep the air inside the car fresh.

Core technology

Endurance antibacterial Materials

Persistent and effective antibacterial, reduce the harm of germs.

Formaldehyde purification Technology

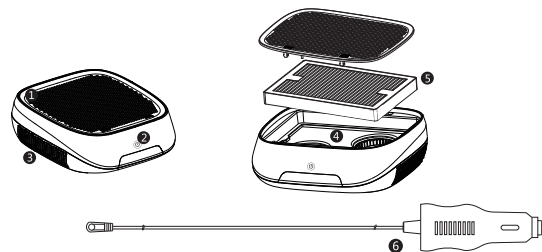

Using modified activated carbon, effective purification of formaldehyde and other harmful gases.

HEPA High efficiency purification technology

CADR value of particulate matter up to 15m³ /H

Product description

Before installing and using the product, read this manual carefully and check the related parts of the product:

- | | |
|----------------------------|----------------------------------|
| 1. Upper cover (INLET) | 4. DC Centrifugal Fan |
| 2. Power and Function keys | 5. Multi-effect Composite filter |
| 3. Outlet (both sides) | 6. Car Power cord |

Manufacturer's statement:

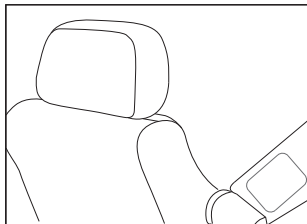

This product picture and the disposition and the physical material if has the difference, in the kind to prevail

Specification parameter

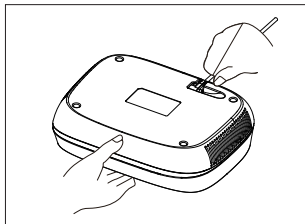

Rated voltage	12V	Rated power	3.5W
CADR (smog)	15m ³ /h	Noise	52dB(A)
Product size	190x167x54(mm)	Net weight	500 g

Installation and use

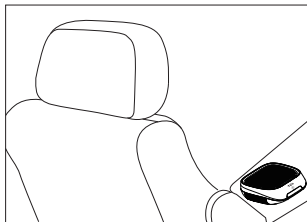

Installation Mode 1

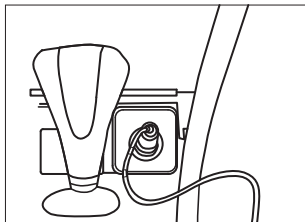

1. Place the Non-slip mat on the car central armrest

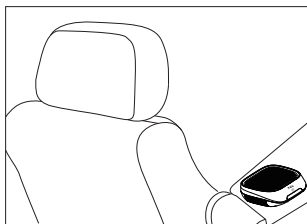

2. Plug the power cord into the car purifier power receptacle

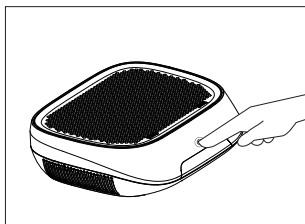

3. Place the vehicle purifier on the Non-slip mat smoothly

4. Plug the power cord into the cigarette holder hole

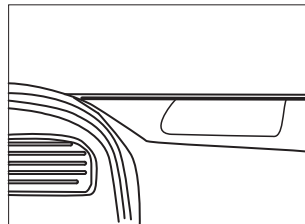

5. The power cord is arranged in the concealed place to facilitate normal driving

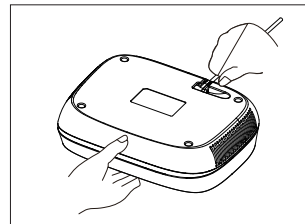

6. Light touch power supply and function key can be realized, shutdown/low-grade, high-grade wind speed switch

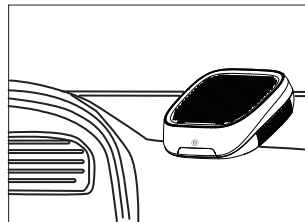

Installation Mode 2

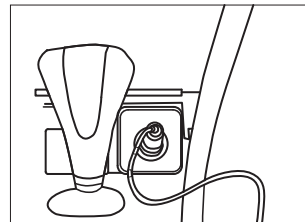

1. Place the Non-slip mat on the front of the car

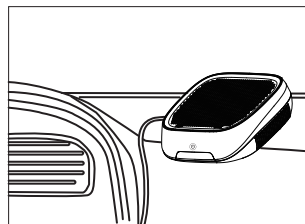

2. Plug the power cord into the car purifier power receptacle

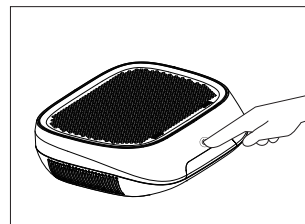

3. Place the vehicle purifier on the Non-slip mat

4. Plug the power cord into the cigarette holder hole

5. The power cord is arranged in the concealed place to facilitate normal driving

6. Light touch power supply and function key can be realized, shutdown/low-grade, high-grade wind speed switch

Operation Instructions

■ When the car purifier connected 12V power supply, "Power and Function keys" led off, car purifier into the Machine status

■ Standby state Touch "power and Function keys", car purifier into the working state, led long bright blue, the blower is running at low speed by the default gear. Touch "power and Function keys" again, the fan switch to high speed gear, the LED color is converted from blue to green.

■ Working state Touch "power and Function keys", fan in low-speed, high-speed stalls between the cycle of work, the light shows the corresponding color (low display blue, high-grade display green).

■ Working status of the long press "power and Function keys" more than 3 seconds, the whole machine into standby state, led off.

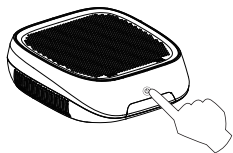

■ Remove all the packaging material filtered on the net, and then put the composite filter into the car purifier inside (see more details Change, Figure 5 "), lock the upper cover.

■ Filter Life Reset: When the filter life reaches the limit, the blue light is lit and blinks at 2 times per second, at this time in standby state under the long press "power and Function keys" more than 5 seconds, leaving the "power and Function keys", Reset completed. such as filter

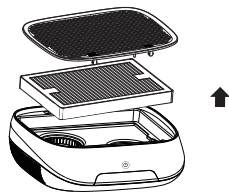

When the lifetime does not reach the limit value, the standby state of the long "power supply and Function key" does not perform the filter life reset action.

■ This machine has the memory function, when the power is in what state, after the power and power before the same state.

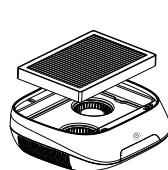

Filter replacement
